All 3 schools share

PLG exclusive screens

DAV exclusive screens

testv3 exclusive screens

Features unique to each school — what they have that the others don't

PLG School — 6 Exclusive Screens

- ▶ **HPC Assessment Approval** — Multi-tier approval for holistic assessment marks
- ▶ **Fee Master Approval** — Principal/admin approval before fee structure goes live
- ▶ **New Concession Approval** — Concession category change needs approval
- ▶ **Student Fee Category Approval** — Fee category changes go through approval
- ▶ **Interview Students** — Interview scheduling & management for admissions
- ▶ **Application Status Count Report** — Count-wise admission status summary

Why PLG has these: PLG has a formal approval workflow structure — no fee or category changes without authorization. Also a competitive-exam focused school (NEET/JEE + HPC suggests CBSE CBE board).

DAV School — 8 Exclusive Screens

- ▶ **Online Enquiries** — Parents submit enquiries from a public web portal
- ▶ **Send Bulk Application Link** — Mass-email admission application links to enquiries
- ▶ **Online Application Status** — Track applications submitted via online portal
- ▶ **Portal Login Access** — Control which parents can access the student portal
- ▶ **Donation Collection** — Separate module for development/donation fee collection
- ▶ **Collection Report (Class-wise)** — Fee collection drilled down by class
- ▶ **Collection Report (Branch-wise)** — Fee collection across branches
- ▶ **Projection Collection Report** — Fee collection projection vs actual

Why DAV has these: DAV runs online admissions — parents apply from home. Also collects donation/development fees separately (common in DAV Trust schools). BlockEnabled=true means they use block-level academic grouping.

Chalo testv3 — 35 Exclusive Screens

- ▶ **Day Closure** — End-of-day cash denomination counting & closure
- ▶ **Student Gate Pass + Report** — Student exit tracking with parent notification
- ▶ **Refund Approval + Receipt + Report** — Full fee refund workflow
- ▶ **Attendance Reason Master** — Configurable absence reason codes
- ▶ **TM Boarding Point Master** — Transport boarding stop management
- ▶ **Vehicle Document Master** — Track vehicle insurance, permits, fitness
- ▶ **Transportation Dashboard** — Live transport operations view
- ▶ **Workflow Approval** — Generic workflow approval engine
- ▶ **Centum Report** — Students scoring 100% in subjects
- ▶ **Class/Staff/Subject/Teacher-Wise Result Analysis** — 5 analysis reports
- ▶ **Fee Collection Priority** + Term Fees Summary
- ▶ **Auto Number Config** — Configure receipt/admission number formats
- ▶ **Storage Extension** — File storage management
- ▶ + 20 more screens

Note: testv3 is the standard Chalo demo — it has features being tested/showcased. Schools may not have all of these enabled in production.

Module-by-Module Comparison Table

All 248 unique screens across 17 modules — columns show which school has each feature

Legend: YES Fully present NO Not present PART Partial / basic version EXCL School-exclusive feature

	Community / Caste / Religion / Nationality	YES	YES	YES	
	Mother Tongue Master	YES	YES	YES	
	Region Master	NO	YES	YES	PLG + DAV only
	House Master	YES	YES	YES	
	Food Habits Master	NO	YES	YES	PLG + DAV only — hostel dietary tracking
	Board Master	YES	YES	YES	

Key Insights: What Makes Each School Different

Summary of architectural and functional differences

PLG School Profile

Type	South Indian School (Tamil Nadu, GST Code 33), likely CBSE
Focus	Competitive exam preparation (NEET/JEE), CBSE CBE compliance (HPC)
Governance	Strict approval workflows — fees, concessions, marks all need approval
Special Features	HPC (skill assessment), TOS (question paper system), Tally Export, Hostel+Boarding
Admissions	Walk-in with interview — no online portal, but formal interview process
AI	eduthalamus.ai (same as others — Chalo's standard AI)

DAV School Profile

Type	DAV Trust School — CBSE, own sub-domain (davtest.chaloschools.in)
Focus	Online admissions, multi-branch operations, donation fee management
BlockEnabled	TRUE — uses Primary/Middle/Senior block structure for academics
Special Features	Online admission portal, donation fee, branch-wise/class-wise fee reports, portal access control
Admissions	Fully online — parents enquire and apply via web portal, school tracks status
No HPC	DAV uses traditional report cards — no HPC/CBE assessment module

Shared Premium Features (PLG + DAV, not in testv3)

- TOS System** — Full question paper creation, coordinator review, principal review workflow

Stream Master — Science/Commerce/Arts stream tracking (11th/12th)
- Event Management** — School event master with categories and reports

Subject Combinations — Elective subject configuration
- Visitor Management** — Front gate visitor entry and reports

GST Module — Full GST with CGST/SGST, HSN/SAC codes, credit notes
- Online Timetable** — Student/parent portal timetable view

Bulk Updates — Staff and student bulk data update tools

Platform Architecture (Common to All 3)

Technical foundation shared across all Chalo Schools instances

Frontend

AngularJS 1.x SPA (blankonApp)
KendoUI commercial components
ocLazyLoad for module loading
Handsontable (mark entry grids)
Multi-language support (EN/HI/TM/MR)

Backend

.NET ASMX Web Services
Each school = separate service instance
testv3: testv3service.chaloschools.in
PLG: testservice.chaloschools.in
DAV: davtestservice.chaloschools.in

AI / Integrations

AI: eduthalamus.ai/schoolapi/chalo_v4
Function: Text rephrasing (circulars)
Tally ERP export (PLG)
Focus ERP export (PLG)
Online payment gateway

Data Source: All data extracted directly from live JS source files (KPS.js, Siva.js, Prabhakaran.js, Eswar.js, Vaishu.js, archana.js) from each school instance. State names extracted via `.state('app.XXX')` pattern matching. Template URLs extracted via `templateUrl: pattern`. Total screens analyzed: PLG=205, DAV=202, testv3=190. Common to all 3=150. Total unique across all=248.

Login APIs: ASMX service endpoints returned runtime errors for remote curl requests (server-side restriction). Feature data derived purely from JS routing files, not from live API calls to PLG or DAV.
